

8 STEPS TO CREATING AN AMAZING STORYBOARD

1. Plan out your story

Think about what scenes are key to your story and create a narrative of the timeline.

2. Add Details

Decide how much detail you want to add to each individual cell and write a description for each one.

3. Workout the Design

First decide if you want to use pen and paper or produce the artwork digitally. Then use grids and color to create different levels of perspective.

4. Organize Your Shots

Use a numbering system to ensure the order of events is clearly understood.
PLEASE MAKE EACH PARAGRAPH 2 LINES

5. Add Camera Direction

Make notes or draw arrows specifying where you want the camera to move to.
PLEASE MAKE EACH PARAGRAPH 2 LINES

6. Logically Group Your Characters

If you are dealing with multiple characters, group them in a way that makes it easy for your audience to pan back and forth.

7. Review

Once you finish your first draft, let it sit for a while and then return to it later to make edits.

8. Get Feedback

When it's all said and done, getting feedback from others can be the best way to improve your storyboard!
